

110V Electric Commercial Nonstick 3.5" Donut Iron Maker Machine(020103)

Introduction:

The products of stainless steel shell, aluminum casting model, with high conductivity, fast heating, energy saving, automatic temperature control function, special non stick coating Teflon, simple operation. High conductive heat evenly electroforming iron so as to be able to provide a golden crispy cake donuts in 3-5 minutes. Removable drip tray around the floor will collect any excess batter, and easy to clean. Double side heating, heating more uniform, more fully, to make the product color uniformity, better quality, one-time molding 5, as well as timing prompt function, the operation is more simple and convenient.

Features:

- 1 double heating, more efficient
- 2 high conductivity, more energy saving, automatic temperature control function
- 3 stainless steel mirror panel body, beautiful appearance, easy to clean
- 4 non stick coating, temperature control precision, high efficiency can send hot wire, heating speed

Parameters:

Voltage:110V

Sealing Power:1500W

Donut size:45*41*27.5cm(17.55''*16''*10.7'')
